Today's Agenda

- Overview SCC & SCOR
- Practitioner Lifecycle
- SCC Training Curriculum
- Customized Curricula
- Training & Certification
- Wrap-up & Questions

- The SCC is an independent, not-for-profit, global corporation with membership open to all companies and organizations interested in applying and advancing state-of-the-art supply chain management systems and practices.
 - Founded in 1996
 - Over 700 Company Members
 - Cross-industry representation
 - Chapters in Australia/New Zealand, Brazil, Europe, Japan, North America, South East Asia, and China with petitions for additional chapters pending.
- The Supply-Chain Council (SCC) has developed and endorsed the Supply Chain Operations Reference model (SCOR) as the cross-industry standard for supply chain management.

The Value of SCOR

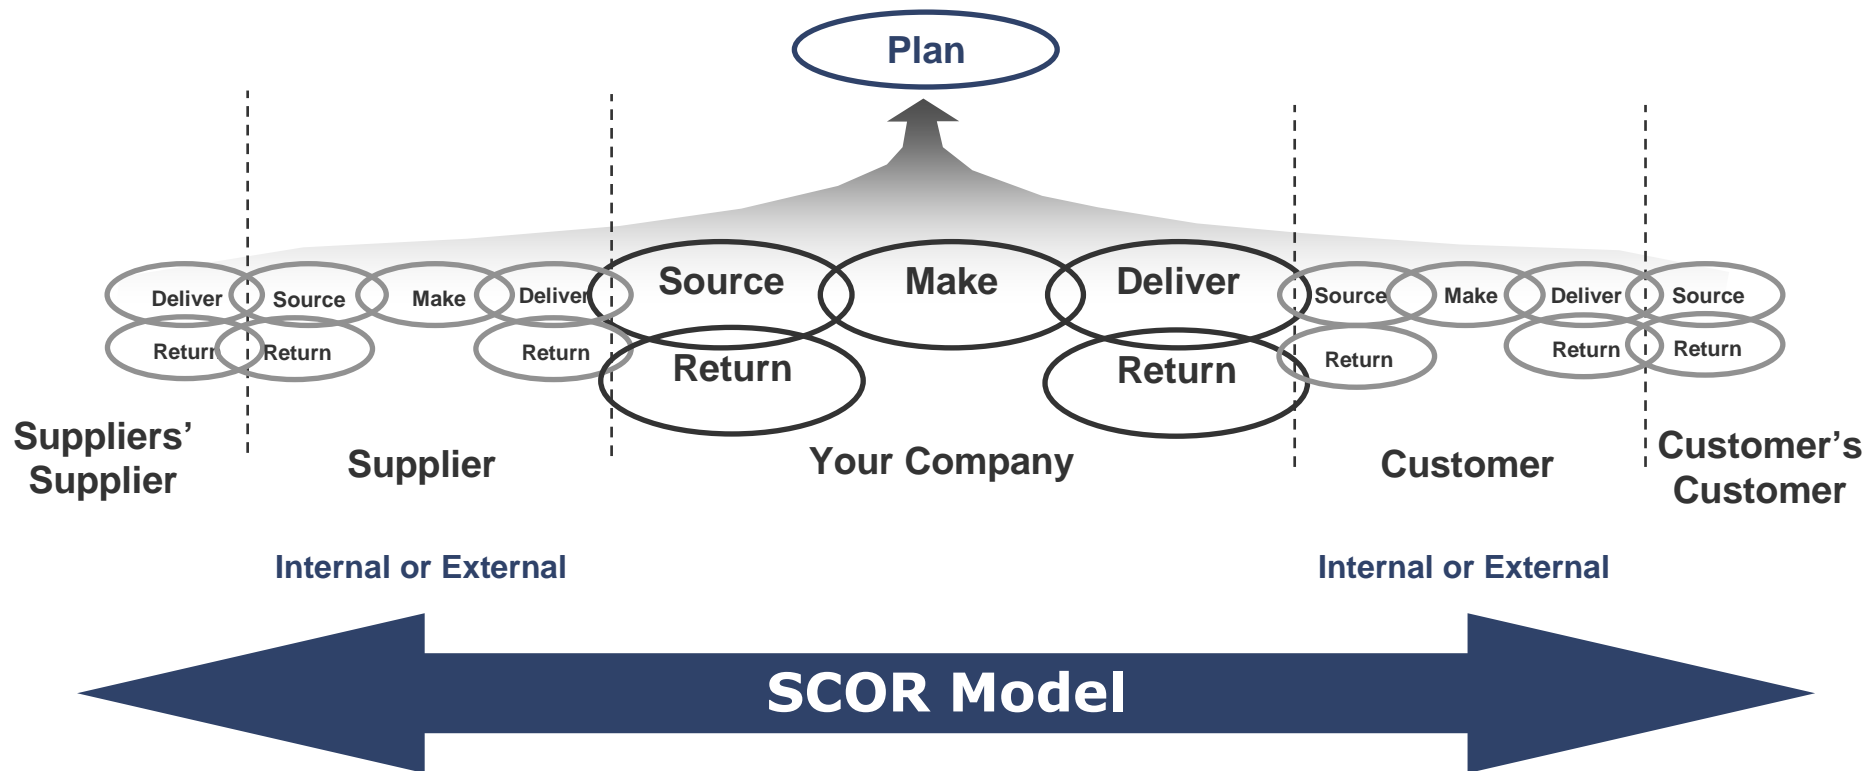

1 Supply-chain Council 2003 – profit and revenue analysis.
2 PCOR Research 2006 – SCOR company share performance – whitepaper in 2007

Companies with formal process management

- Are 780% more profitable than peers¹.
- Exhibit greater share growth than leading market indicators².

SCOR: End-to-End Supply-Chains

- SCOR is structured around five distinct management process which cover all work, material and information flows in borderless supply-chains.

SCOR Hierarchy

Level 1	Level 2	Level 3	Level 4	Level 5
Scope	Configuration	Activity	Workflow	Transactions
Differentiates Business	Differentiates Capabilities	Names Tasks	Sequences Steps	Links Transactions
Defines Scope, Enterprise Strategy	Differentiates Supply-chain Strategies	Links, Metrics, Tasks and Practices	Job Details	Details of Automation
Framework Language	Framework Language	Framework Language	Industry or Company Specific Language	Technology Specific Language

- SCOR itself is a tool – training enables its exploitation
- Some of our milestones...
 - 10 Years of SCOR
 - 2500 companies
 - Thousands of current workshop alumni
- ... Have led us to understand the need - and sources - for a vastly expanded focus on how to exploit SCOR
- Problems with existing certification (Six-Sigma, Lean) highlight need for controlled certification and training
- The best conduit to members for results from Special Interest and Research and Development with SCC Volunteer groups (e.g. Six-Sigma & SCOR, Risk Management) is through training
